DETAILED ACTION

Applicant's cancellation of claim 128, in the paper of 10/25/2007, is acknowledged. Claims 127 and 129 are pending and still at issue.

Specification

The disclosure is objected to because of the following informalities:

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the following reason(s): 37 CFR 1.821. (d) states "Where the description or claims of a patent application discuss a sequence that is set forth in the "Sequence Listing " in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the sequence identifier, preceded by "SEQ ID NO:" in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application. Applicants Figure 1 and Figure 16 each list two distinct sequences, a nucleic acid sequence and an amino acid sequence. Applicant's description of figure 1, as amended on 4/21/2003, only lists a single sequence identifier, SEQ ID NO: 11, for a nucleic acid sequence and is thus missing a sequence identifier for the listed amino acid sequence. Similarly the description of Figure 16, as amended on 4/21/2003, only lists a single sequence identifier, SEQ ID NO: 42, for a nucleic acid sequence and is thus missing a sequence identifier for the listed amino acid sequence.

Appropriate correction is required.
